

Our Promise

You can be rest assured that all necessary steps to prevent and decrease stress to you and your family will be taken by our staff healthcare providers. By the complete and thorough care, we at IHMS, minimize unnecessary trips to the emergency room or hospitals, helping you effectively control your health while staying in the comfort of your own home.

We are proud to help our patients with their health and well-being.

Thank you for letting IHMS provide you with all your mobile health care services.

“Cory made us feel comfortable from the start. He was friendly and felt we received great medical care.”

— Mr. and Mrs. Eugene F.

Who We Are

Our mobile family practitioners provide high quality medicine emphasizing the patient's health, well-being and illnesses prevention. Our goal is to provide you with the best possible care for all of your health care needs in a caring and pleasant environment in the comfort of your own home.

What We Do

As family practitioners at IHMS, we provide care at all stages of life. We give patients the attention required whether they are in their own homes, moving into a care facility or transitioning from independent care to assisted living/memory care homes. We provide quality medical care for patients throughout their lives by ensuring they get appropriate screening and preventive services well

Comprehensive Care

- Comprehensive annual physicals, with cognitive and psychosocial assessment.
- Monitor medical conditions and diseases like Hypertension, Diabetes, High cholesterol, nutritional deficiencies.
- Develop a personal plan of care to address medical needs of our patients
- Recommend specific care plans to help improve health and mobility through in conjunction with our Physical/Occupational therapy, skilled nursing and other mobile partners.
- Educate patients, caregivers and family about their specific medical needs.
- Provide end of life counseling when appropriate.
- Coordinate with your primary care doctor and specialist physicians to help provide continuity and complete care.
- Review and management of current medications.
- Current and old medical records reviewed for complete care.
